Other

Skill activation order

During a game, players can decide the activation order for skills that trigger at the same time, such as when multiple cards with "when attacking" skills attack.

If both you and your opponent have skills that trigger at the same time, the turn player's skills take precedence for activation. After all of the turn player's skills have been resolved, then the opponent's skills will activate.

"When KO'd" skills

When a card is sent to its owner's Drop Area after losing a battle or is KO'd by a skill with text such as "KO that card," skills with text such as "when KO'd" will trigger.

When a card's power is reduced to 0 by a card's skill, it's placed in its owner's Drop, but this processing is different from being KO'd, therefore "when KO'd" skills don't trigger.

Reducing the specified cost

Upon activation of a skill that reduces the specified cost for the next card that you use, the total cost is reduced by the same amount at the same time.

Activate Main **Once per turn** Add 1 card from your life to your hand : During this turn, the next time you use an Extra from your hand, reduce the cost by **R** .
